

HOVERCRAFT BLUEPRINTS

This is a sample blueprint design for the hovercraft project. If you need blueprints you can print this one out and label it with the 10 vocabulary words you are going to use in your project. Remember, your final project does not have to look (and can be changed at anytime) like your blueprints. The blue prints are for you to **organize how and where you will use and explain the vocabulary** you select for your presentation in front of the class.

Vocab words and how they will be explained (**do not** write the definitions).
